	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the	300021
,BR23CD	distance of a player from basket for N shots. The index of array represents the position of the player. Score is calculated by multiplying the position with the distance from the basket.	2
BR	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	521 3BR21
2	Note:	(
3000273	* A subarray is a contiguous part of array.	22300
	* Assume 1 based indexing.	P. P.
3BR2	* The array contains both negative and positive values.	9
32	* Assume the player is standing on a cartesian plane.	3000273
